

ERRATA

Rule Book, Page 8, Firepower - The description of the value before and after the slash is reversed. The first number (before the slash) is anti-vehicle and the second number is anti-infantry. Both of the diagrams on Page 7 and 8 are also wrong.

Player Aid Card - Underneath Operations Range and Command Points, it says that "Vehicles, Guns, and Artillery count as 2 units Used." It should say "as 3 units Used." (It is correct on the other side of the card and in the rules)
